PROFESSIONAL SUMMARY

Backend-focused Computer Science Engineering student (CGPA: 9.14) with hands-on experience in building scalable REST APIs using Node.js, Express.js, and MongoDB. Developed a blockchain-based government license system with secure document handling and published research in IJRASET (2025). Strong foundation in backend architecture, authentication, and database design. Seeking an entry-level backend developer role to build efficient, real-world systems.

EDUCATION

G.H. Raisoni University, Amravati
B.Tech in Computer Science & Engineering: ***CGPA: 9.14/10*** *Sep 2022 - Ongoing*

Kendriya Vidyalaya Ajni, Nagpur
Higher Secondary Certificate (HSC) – Science: ***Per. 75.06%*** *April 2020 - June 2022*

Kendriya Vidyalaya Ajni, Nagpur
Senior Secondary Certificate (SSC) – Science: ***Per. 85.04%*** *April 2019 - March 2020*

TECHNICAL SKILLS

Programming Languages: Python, SQL, Javascript
Backend & App Frameworks: Node.js, Express.js
APIs & Architecture: RESTful APIs, JSON, HTTP/HTTPS, Authentication, Client–Server Architecture
Tools & Platforms: Git, GitHub, Excel, Postman
Databases: MYSQL, PostgreSQL, Supabase, MongoDB

PROFESSIONAL EXPERIENCE

Software Developer Intern – *AnkHub Technology And Services* *Dec 2025 - Present*

- Developed and tested **10+ REST APIs using Node.js** for different application modules.
- Designed and optimized **MongoDB** for data storage, retrieval, and schema-based operations.
- Implemented **backend logic and database communication** to support application features.
- Collaborated with frontend team in **API integration with frontend components** across multiple features.
- Debugged **backend issues and improved API performance and response handling.**
- Validated **API endpoints using Postman** and ensured reliable data flow

KEY PROJECTS

DIGISEWA (Blockchain-Based Digital Government License & Registration System) **GitHub**

Tech Stack: Ethereum, Solidity, Ether.js, ReactJS, IPFS, Meta Mask, Hardhat, Node.js, PostgreSQL

- Built a decentralized license issuance & verification platform using **Ethereum smart contracts**.
- Integrated **IPFS (Pinata) with AES/RSA encryption** to ensure secure and tamper-proof document storage
- Implemented **role-based dashboards with JWT authentication** for multi-department workflows
- Designed backend APIs for secure data handling and blockchain interaction
- Improved transparency and reduced manual processing delays through automation

Research Publication:

- Published this project as a research paper in **International Journal for Research in Applied Science & Engineering Technology (IJRASET)**, ISSN: **2321-9653,** Volume **13**, Issue **XI**, November **2025**, DOI: https://doi.org/10.22214/ijraset.2025.75095

Milestone Enterprises Management System (Admin Portal) **GitHub**

Tech Stack: Node.js, Express.js, MongoDB

- Developed a scalable backend using **Node.js, Express.js, and MVC architecture**.
- Implemented **JWT authentication**, **bcrypt password hashing**, and **RBAC** for secure access control.
- Built RESTful APIs for Product, Category, Client, Vendor, Expense, and Project modules.
- Designed optimized **MongoDB schemas** with indexing and soft-delete strategy.
- Implemented centralized error handling, response management, and middleware-based validation.
